

Q52 SLIDING DOOR

SLIDING GLASS DOOR SYSTEMS FOR REFRIGERATED CABINET

Shock absorber rubber

Speed controlled adjustable gravity system

Upper wheel system with long life circle

PRODUCT DESCRIPTION

Q52 sliding doors are a perfect complement to refrigerated cabinets, which on the one hand guarantee high energy savings and on the other hand offer hygienic and temperature protection. A slim and functionally reliable glass package offers the customer quick access to the goods. The attractive design complements the appearance of the refrigerated cabinet in narrow aisles. Systems work with adjustable gravity systems that you can arrange closing speed of the doors.

- Saves up to 50% energy in existing Multidecks
- Speed controlled adjustable gravity system
- OEM & Retrofit version available
- Upper wheel system with long life circle
- Easy installation
- Optional LED lighting
